

Autonomous Fraud Operations

Attacks run **1:many**. Operations still run **1:1**.

In production at Tier 1 European banks since December 2025.

THE CURRENT LANDSCAPE

Nobody owns the space **between your teams.**

81% of fraud campaigns now contain cyber elements.

A single campaign crosses every boundary you built your teams around.

THE CURRENT LANDSCAPE

Attack economics collapsed. Defence economics didn't.

One side scales with software.
The other still scales with people.

They multiply. **You add.**

THE PART NOBODY SAYS OUT LOUD

Capacity is defining operational risk appetite.

30%

of fraud exposure never gets reviewed because which events get looked at is decided by how much capacity exists, **not by policy.**

Automation is additive. **Autonomy is structural.**

Faster is not the same as complete.

AUTOMATION

Makes a step faster and leaves the person as the limit of the system.

AUTONOMY

Removes the person from the processing work and keeps them in the decision.

INTRODUCING

Nyx

Detection, investigation, campaign hunting and control tuning, **running at once and continuously**, with nothing waiting on a person.

In production at Tier 1 European banks since December 2025.

< 5 min

full forensic investigation

100%

of events, no sampling

0

manual analyst effort
in the investigation

PROOF

Validated through blind review by the bank's own senior fraud analysts.

A Tier 1 European retail bank took cases its own team had closed, stripped every note and verdict, and handed them to Nyx blind.

100%

same verdict on every confirmed-fraud case

9%

real fraud found in cases closed as legitimate

< 4 min

per investigation with full evidence trail reconstructed

PROOF

“

*It matched my senior team
on every case, and caught
what they'd missed.*

”

Head of Fraud, Tier 1 European Retail Bank

Nyx is new. The platform under it isn't.

Nyx runs on Cleafy's established FXDR platform, proven in production, driving BCC Iccrea Group to near-zero fraud in months, not years.

40%

reduction in fraud in 3 weeks

Nyx delivered impact with no training phase and no waiting.

near-zero

fraud achieved in 6 month

Nyx stayed effective, driving Iccrea's fraud to near-zero.

99.4%

yearly fraud reduction

€80M → €0.5M losses / year

“

Cleafy's platform **strengthens our protection** against current threats while proactively mitigating emerging risks.

”

Andrea Coppini · Head of Digital Innovation & Multichannel Division, BCC Iccrea Group, Italy

WHO WE ARE

Why Cleafy can **define this category.**

First to identify **SharkBot, TeaBot, BRATA, PixPirate, SpyNote, BingoMod, SuperCard X and Klopatra**.
Cleafy LABS has uncovered 70%+ of all known zero-day banking malware since 2016.

SPARK Leader

Enterprise Fraud Mgmt, Q4 2025

183+

financial institutions, 3 continents

200M+

events protected every day

4.2 / 5

Gartner Peer Insights rating

100%

customer retention over 10 years
