

DGS Group Corporate Presentation

DGS is the Italian Intensive Technology Innovation Partner
powering the AI-Secure Digital Economy

For nearly **30 years**, we've helped organizations modernize processes, systems, and infrastructures, making them secure and future-ready.

We build robust, AI-ready foundations that support **continuous innovation** and **measurable results**.

OUR STRATEGIC OFFERING

CYBERSECURITY

- Cyber advisory services
- Managed security services
- Customized solutions

AI & DATA SENSE

- AI Data solution
- Data marketing
- Physical AI

SMART ENTERPRISE PLATFORM

- Application modernization & OPs
- Core enterprise application
- Enterprise architecture

DIGITAL ENGINEERING

- Product lifecycle management
- Supply chain
- Industrial IoT

SECURITY DOMAINS

| VISIBILITY | ZERO TRUST | MONITORING, CONTROL & REMEDIATION | ENABLING & AUTOMATION | IDENTITY SECURITY GOVERNANCE | OT & IOT PROTECTION | DATA & AI PROTECTION | MANAGED SERVICES

NETWORK SECURITY & INFORMATION PROTECTION

- Endpoint protection
- Web & e-mail protection
- Firewall policy mgmt

CRITICAL INFRASTRUCTURE PROTECTION & AUTOMATION

- OT & IOT protection
- Cyber security services (VA/PT)
- Security incident event mgmt
- Malware protection

SECURITY STRATEGY & COMPLIANCE

- Orchestration & remediation
- Privileged account mgmt
- Endpoint protection solutions
- Threat detection
- Data access governance

SOC & CLOUD SECURITY

- Cloud (PAM, IAM, IAG)
- Automation & orchestration
- Cloud workload protection
- External threat detection

MANAGED SECURITY SERVICE PROVIDER

- ID threat detection & response
- Cloud native app protection
- Api protection
- Attack surface mgmt
- Extended detection & response

Cybersecurity DGS Partner's Ecosystem

We build strategic alliances with best-of-breed global technology leaders

Partnership strategy with leader global Vendors representing the "State of the Art" of Cybersecurity.

Selection of the "best of breed" solutions on the market.

Constant research, analysis and testing of the most innovative "pioneers".

Professionals and experts with the highest certifications on solutions and services.

VENDOR STRATEGICI PER LA CYBERSECURITY

VISIBILITY

Visibility is a key factor in understanding the attack surface to identify risks, monitor all attack vectors, and manage vulnerabilities to protect assets and brands.

ZERO TRUST

The zero-trust security model does not rely on trust, verifying and authenticating every user and device, and continuously monitoring threats to improve cybersecurity.

MONITORING, CONTROL & REMEDIATION

Monitoring Control & Remediation solutions monitor infrastructure, proactively detect threats and automate incident response. We offer xDR, SIEM, SOAR and Behavioral Analysis.

IDENTITY SECURITY GOVERNANCE

Multi-layered identity visibility enables proactive management of operational risk and increased resilience. Includes: Identity Governance, PAM, IAM, IGA, Secrets Management, CIEM.

ENABLING & AUTOMATION

Security Automation involves using technology to streamline and improve security processes, reducing manual effort and improving response times.

OT & IoT PROTECTION

Securing OT and IoT requires: behavioral analytics, network segmentation, authentication, encryption, updates, anomaly monitoring, third-party auditing, incident response, and regulatory compliance.

DATA PROTECTION

Multi-layered data visibility proactively manages information loss risk and increases operational resilience. We offer: Data Governance, Data Breach, Data in Motion, Data at Rest, Data at Use.

MANAGED SERVICES

Managed Services include: MDR, Incident Response, Red Teaming, Security Infrastructure operation and Threat Intelligence for IT, IoT and Identity.

What we do with our innovation laboratories

EXPERIENCE

Experiment cutting-edge solutions and technologies from innovative startups and leading industry vendors.

ENHANCE

Consolidate internal skills through the development, verticalization and valorization of people.

DESIGN AND DEVELOP

Build tailor-made solutions for our customers.

These activities are organized into specific domains, each including one or more dedicated laboratories

| IDENTITY SECURITY | DATA PROTECTION | SECURITY AWARENESS | CLOUD SECURITY

| MONITORING, REMEDIATION
AND INCIDENT RESPONSE

| ENABLING AND AUTOMATION

| CRITICAL INFRASTRUCTURE
& IOT PROTECTION
