

ORACLE

WeSec - Il Salone della Sicurezza 2026

IL VALORE DELLE INFORMAZIONI: AI E STRUMENTI
DI ANALISI PER UNA SICUREZZA DATA-DRIVEN

Fabrizio Zarri

Field CISO

Office of CTO

Oracle EMEA - Technology Engineering

Sep 23rd, 2026

Regulatory and Security Challenges

Data becomes valuable when we connect it, understand it, and use it in time.

DATA PROTECTION

Six controls to protect data throughout its lifecycle

Encryption

In transit and at rest; key management.

Access Control

Least privilege and strong authentication.

Data Minimization

Only the data needed for the intended purposes.

Pseudonymization

Reduce exposure of identifying data.

Audit & Monitoring

Access traceability and anomaly detection.

Data Retention

Defined retention periods and secure deletion.

Oracle: Secure Data, Governed AI

Decades of expertise in managing and protecting enterprise information.

FLEXIBLE DEPLOYMENT

On-premises, OCI public cloud, distributed cloud and multicloud

On-Premises
In your own data center.

OCI Public Cloud
Oracle public cloud regions.

Exadata Cloud@Customer
Database services in your data center.

Dedicated Region
A dedicated OCI cloud region.

EU Sovereign Cloud
EU data location and operational controls.

Multicloud
Oracle AI Database on AWS, Azure and Google Cloud.

Help prevent fraud and threats while retaining control of data and AI and supporting regulatory compliance.

Protection • Governance • Analytics — By Design

From Data to Risk Anticipation

ADD CONTEXT

GeoCrime example

Where • When • Frequency • Proximity

Rules & Machine Learning

Detect patterns • Estimate risk

Generative AI

Explain evidence • Summarize findings

Agentic AI

Coordinate checks • Adapt next steps

AI supports. People decide.

ORACLE

From Knowledge to Business Outcomes

Start with industry apps. Extend with AI. Connect existing systems.

**Ready-to-use
apps**

Oracle Industry Apps

Industry processes, data models & AI

Financial services: risk • fraud detection • customer insight

**Build &
connect**

**Oracle AI Data
Platform**
Custom AI &
automation

Oracle AI Database
Enterprise data & analytics

OCI Generative AI
OCI Generative AI Agents
Assistants & agents

Oracle Integration
Connect apps & processes
Existing and third-party systems

**Scale the
foundation**

Oracle Cloud Infrastructure (OCI)

Compute • Network • Storage • GPUs

Scale resources to workload needs

Faster assessments

Higher productivity

Less complexity

Build on existing investments

ORACLE
