Fee Calculation

Certifications

ISO 9001

Quality management system in the field of design, development, maintenance, electronic payment/collection applications assistance and provision of related services in SaaS or Hosting mode.

ISO 27001

It is the security management system for information.

PCI DSS

It is the international standard established by the PCI Security Standards Council that provides a baseline of technical and operational requirements designed to protect account data.

PCI P2PE

It is the international standard established by the PCI Security Standards Council to validate in their entirety (hardware, software, gateway, encryption, device management) electronic payment solutions, ensuring that sensitive and confidential data are sufficiently protected in all components of the system.

ISO 22301

It is the ISO standard that specifies the requirements for designing, implementing and efficiently running an operational continuity management system.

ISO 27017

It is the code of conduct for information security checks for the provisioning of cloud services.

PCI PA DSS

It is the international standard defined by the PCI Security Standards Council for software providers developing payment applications.

PCI PIN Security

The PCI PIN Security standard includes a comprehensive set of requirements for the secure management, processing & transmission of personal identification number (PIN) data and data relating to unattended POS terminals.

LEGENDA

- Products
- Services
- Quality

ISO 27018

It is the code of conduct for the protection of Personally Identifiable Information (PII) for cloud provider services.

PCI SSF* in progress

Secure Software Framework evaluates vendors and their payment software products against the SLC Secure Standard and the SSS Standard.

PCI 3DS Core

It is a Security Standard by PCI SSC, supporting the functionality of EMVCo's EMV 3D Secure core security protocol.
